There are several forms of opt- outs available at different levels:

Type 1 opt-out - If you do not want personal confidential information that identifies you to be shared outside your GP practice you can register a 'Type 1 opt-out' with your GP practice. This prevents your personal confidential information from being used except for your direct health care needs and in particular circumstances required by law, such as a public health emergency like an outbreak of a pandemic disease. If you do not want your information to be used for any purpose beyond providing your care you can choose to opt-out. National data opt-out - The national data opt-out was introduced on 25 May 2018 and replaces the previous 'type 2' opt-out. NHS Digital collects information from a range of places where people receive care, such as hospitals and community services. The new programme provides a facility for individuals to opt-out from the use of their data for research or planning purposes. For anyone who had an existing type 2 opt-out, it will have been automatically converted to a national data opt-out from 25 May 2018 and you will receive a letter giving you more information and a leaflet explaining the new national data opt-out.
